Treasurers' Sales of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Ministry of Government Services for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Ministry of Natural Resources whether or not the land or any part can be purchased or leased from the Ministry. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

THE ENVIRONMENTAL ASSESSMENT
ACT, 1975

O. Reg. 518/80.
Exemption—Ontario Development
Corporation—ODC-1.
Made—May 14th, 1980.
Filed—June 20th, 1980.

ORDER MADE UNDER
THE ENVIRONMENTAL ASSESSMENT
ACT, 1975

EXEMPTION—ONTARIO DEVELOPMENT
CORPORATION—ODC-1

Having received a request from Ontario Develop-
ment Corporation that an undertaking, namely:

The construction of a 300 yard storm drain to
service buildings and lands at the Sheridan Park
Research Community in the City of Mississauga,

be exempted from the application of the Act pursuant to
section 30; and

Having been advised that if the undertaking is sub-
ject to the application of the Act, the following injury,
damage or interference with the persons and property
indicated will occur:

- A. The Crown will be interfered with and dam-
aged by the undue delay and expense required
to prepare an environmental assessment for
an undertaking that will have no significant
adverse effect on the environment and, by not
being able to respond quickly to the local
needs for projects necessary for the servicing
of Sheridan Park, a community established by

the Crown, devoted solely to industrial research and development.

- B. The public will be interfered with and damaged by the loss of new employment opportunities through cessation of current construction of research facilities because of lack of required services, primarily of a minor nature.

Having weighed such injury, damage or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The Environmental Assessment Act, 1975

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING

RE: An Environmental Assessment for the Puslinch Crown Resource Management Area
Proponent: The Ministries of Natural Resources and Transportation and Communications
EA File No. 1-78-0001-000

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on May 7, 1980. No submissions and no notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking were received.

The undersigned has considered the purpose of *The Environmental Assessment Act, 1975*, and the environmental assessment of the undertaking as accepted.

Accordingly, approval to proceed with the undertaking is hereby given.

	024511	Tetracyn	PFI 2.2000

Note
The use of tetracyclines during tooth development (last half of pregnancy, infancy and childhood to the age of 8 years) may cause permanent tooth discoloration (yellow-grey-brown). This reaction is more common during long-term use of the tetracyclines, but has been observed following short-term courses. Enamel hypoplasia has also been reported. Tetracyclines should therefore not be used in this age group unless other antibiotics are not likely to be effective or are contraindicated.

Hypertension: Fixed Combination Drugs

A fixed combination drug is not indicated for initial therapy of hypertension. Hypertension requires therapy titrated to the individual patient. Recognizing this, if the fixed combination drug meets that titrated dose of its individual components, its use may be more convenient in the management of the individual patient. The treatment of hypertension is not static, it must be re-evaluated as conditions in each patient warrant. Adapted from F-D-C Reports, Sept. 11, 1972, p.8 (FDA Cardiovascular Advisory Committee).

Hypertension: Fixed Combination Drugs

A fixed combination drug is not indicated for initial therapy of hypertension. Hypertension requires therapy titrated to the individual patient. Recognizing this, if the fixed combination drug meets that titrated dose of its individual components, its use may be more convenient in the management of the individual patient. The treatment of hypertension is not static, it must be re-evaluated as conditions in each patient warrant. Adapted from F-D-C Reports, Sept. 11, 1972, p.8 (FDA Cardiovascular Advisory Committee).

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on May 14/80. I have received no notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking.

I have considered the purpose of *The Environmental Assessment Act, 1975*, and the environmental assessment of the undertaking as accepted by me. No submissions have been received with respect to the environmental assessment.

Accordingly, I hereby give approval to proceed with the undertaking with the three conditions as stated in the review.

REASONS:

The reasons for giving approval are:

- (1) I received no submissions or notices requiring a hearing by the Environmental Assessment Board after giving either the *Notice of Completion of Environmental Assessment Review* dated February 11, 1980 or after giving the *Notice of Acceptance of the Environmental Assessment*, dated April 22, 1980. I am not aware of any outstanding issues with respect to this undertaking which suggest that a hearing should be called.
- (2) The environmental assessment together with the Government review and the attached conditions sufficiently fulfills the purpose of *The Environmental Assessment Act*, which is the betterment of the people of the whole or any part of Ontario by providing for the protection, conservation and wise management in Ontario of the environment.

HARRY PARROTT,
Minister of the Environment,
135 St. Clair Avenue West,
14th Floor,
Toronto, Ontario M4V 1P5.

Treasurers' Sales of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Ministry of Government Services for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Ministry of Natural Resources whether or not the land or any part can be purchased or leased from the Ministry. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

EXEMPTION—ONTARIO HYDRO—OH-22

Having received a request from Ontario Hydro that an undertaking, namely:

The installation, operation and de-commissioning of an experimental 145 kw hydroelectric generator at the site of an existing water impoundment known as Waddell Falls,

be exempted from the application of the Act pursuant to section 30; and

Having concluded that undue delay and expense would result from the application of the Act to a limited experimental program involving a small project and having weighed such injury, damage or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The undertaking is of a small experimental nature to be carried out over a limited period of time at an existing water impoundment.
- B. The existing environment is unlikely to be significantly changed as a result of the undertaking.
- C. The implementation of additional projects of this nature beyond this single experimental facility, are subject to *The Environmental Assessment Act*.

This exemption is subject to the following terms and conditions:

- 1. The undertaking shall be implemented and operated so as to avoid significant changes in the water levels of any affected water to the satisfaction of the Ministry of Natural Resources.
- 2. Where the undertaking which is subject to this order, is being carried out in connection with an undertaking for which an environmental assessment has been done and approval to proceed received, the undertaking exempt under this order shall be carried out in accordance with the approval to proceed.
- 3. Where the undertaking which is the subject of this order, is being carried out in connection

with an undertaking which is the subject of an exemption order under this Act, the undertaking exempt under this order shall be carried out in accordance with the conditions of the exemption order dealing with the associated exempted undertaking as well as these conditions.

- 4. This undertaking does not include any work for which an approval under the Act has been obtained. O. Reg. 609/80.

Dated this 9th day of July, 1980.

The Environmental Assessment Act, 1975

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING

RE: An Environmental Assessment for the Proposed Sewage Treatment Facilities at the Corporation of the Township of Marathon
Proponent: Ministry of the Environment
EA File No. 1-79-0006-000

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on June 13, 1980. I have received no notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking.

I have considered the purpose of *The Environmental Assessment Act, 1975*, and the environmental assessment of the undertaking as accepted by me. No submissions have been received with respect to the environmental assessment.

Accordingly, I hereby give approval to proceed with the undertaking subject to Conditions No. 1, 2, 3 (as amended), 4 (as amended), 5, 6, 7, 8, 9 and 10, as listed in the Government Review.

REASONS:

The reasons for giving approval are:

- (1) I received no submissions or notices requiring a hearing by the Environmental Assessment Board after giving either the *Notice of Completion of Environmental Assessment Review* dated January 2, 1980 or after giving the *Notice of Acceptance of the Environmental Assessment*, dated May 16, 1980. I am not aware of any outstanding issues with respect to this undertaking which suggest that a hearing should be called.

- (2) The environmental assessment together with the Government review and the attached conditions sufficiently fulfills the purpose of *The Environmental Assessment Act*, which is the betterment of the people of the whole or any part of Ontario by providing for the protection, conservation and wise management in Ontario of the environment.

HARRY PARROTT,
Minister of the Environment,
14th Floor,
Toronto, Ontario M4V 1P5.

PROPOSED REGULATION UNDER
THE OCCUPATIONAL HEALTH AND SAFETY ACT, 1978

ASBESTOS - DESIGNATED SUBSTANCE

1. In this Regulation,
 - (a) "asbestos" means a fibrous asbestos mineral;
 - (b) "fibre" means a fibre of asbestos longer than five micrometres with a length to diameter ratio not less than 3.1 as counted in a phase contrast optical microscope at 400-500 magnification;
 - (c) "fibres/cc means fibres per cubic centimetre.
2. Asbestos is prescribed as a designated substance.
3. This Regulation applies to every employer at a work place where asbestos is present, processed, mined, used, handled or stored and at which a worker is likely to inhale or ingest asbestos.
4. (1) Subject to section 11, every employer shall, otherwise than by requiring a worker to wear and use respiratory equipment, control the exposure of a worker to airborne asbestos so that the time-weighted average exposure of the worker does not exceed,
 - (a) in the case of amosite, 0.5 fibres/cc of air,
 - (b) in the case of crocidolite, 0.2 fibres/cc of air, and
 - (c) in the case of chrysotile or any other asbestos except amosite and crocidolite, 1.0 fibres/cc of air.

(2) Subject to section 11, every employer shall, otherwise than by requiring a worker to wear and use respiratory equipment, control the exposure of a worker to airborne asbestos so that such exposure does not exceed in any period of time,

- (a) in the case of amosite, 2.0 fibres/cc of air,
- (b) in the case of crocidolite, 2.0 fibres/cc of air, and
- (c) in the case of chrysotile or any other asbestos except amosite and crocidolite, 5.0 fibres/cc of air,

(3) The time-weighted average exposure shall be calculated in accordance with the Schedule.

5. Upon receiving a report from the examining physician under subsection 1 of section 13 that the health of a worker has been impaired by exposure to asbestos, the employer may, with the approval of the Chief Physician, Occupational Health Medical Service of the Ministry, remove the worker from exposure to asbestos.

6. (1) Every employer shall cause an assessment to be made of the exposure or likelihood of exposure of a worker to the inhalation or ingestion of asbestos.

(2) In causing the assessment to be made, the employer shall consider and take into account such matters as,

- (a) the methods and procedures used or to be used in the processing, mining, use, handling or storage of asbestos;
- (b) the extent and potential extent of the exposure of a worker to the inhalation or ingestion of asbestos; and

- (c) the measures and procedures necessary to control such exposure.

(3) In causing the assessment to be made, the employer shall consult thereon with the joint health and safety committee required to be established under clause b of subsection 2 of section 8 of the Act and the committee may make recommendations with respect to the assessment.

7. (1) Where the assessment discloses that a worker is likely to inhale or ingest asbestos, and that the health of the worker may be affected thereby, an employer shall develop, establish, put into effect and maintain measures and procedures to control the exposure of the worker to asbestos.

(2) The measures and procedures mentioned in subsection 1 shall be incorporated into an asbestos control program.

(3) The asbestos control program shall include provisions for,

- (a) engineering controls and work practices to control the exposure of a worker to asbestos;
- (b) methods and procedures to monitor the airborne concentrations of asbestos in the work place and the exposure of the worker thereto;
- (c) personal exposure records of a worker to asbestos to be maintained by the employer;
- (d) medical examinations and tests of a worker including pre-placement and periodic medical examinations, X-rays and tests, but only with the consent of the worker; and

8. Where a change is made in a process involving asbestos, or in the methods and procedures in the mining, use, handling or storage of asbestos and the change might result in a significant difference in the exposure of a worker to the inhalation or ingestion of asbestos, the employer shall cause a further assessment to be made forthwith and develop, establish, put into effect and maintain an asbestos control program to control the exposure of the worker to asbestos as a result of the change and the provisions of sections 6 and 7 apply to the assessment and the asbestos control program required by this section.

9. Where disputes arise between an employer and a joint health and safety committee as to an assessment required under section 6 or 8 or the asbestos control program required under section 7 or 8 or any provisions therein, the employer or a member of the joint health and safety committee may notify an inspector thereof who shall investigate and give a decision thereon in writing to the employer and the joint health and safety committee.

10. A copy of the asbestos control program shall be given by the employer to each member of the joint health and safety committee and shall be made available by the employer to every worker affected thereby.

11. (1) Respiratory equipment shall not be provided by an employer to be used by a worker except where an employer establishes to the satisfaction of an inspector that,

(a) the control of the exposure of a worker to concentrations of airborne asbestos as prescribed by section 4 is not feasible because the measures and procedures required to do so,

- (i) do not exist or are unavailable, or
- (ii) are unreasonable for the length of time of exposure or the nature of the work, or

(b) the control of the exposure of a worker to airborne concentrations of asbestos prescribed by section 4 is ineffective because of a temporary breakdown of equipment.

(2) Where respiratory equipment is provided by an employer and used by a worker the respiratory equipment shall be appropriate in the circumstances for the type and the concentration of airborne asbestos and shall meet or exceed the requirements set out in the Code for Respiratory Equipment for Asbestos dated the 15th day of August, 1980, and issued by the Ministry.

(3) The employer shall provide training and instruction to a worker in the proper care and use of respiratory equipment.

12.(1) The medical examinations and tests in an asbestos control program shall provide for,

- (iii) laboratory tests including analysis of blood or urine or both as required by the examining physician;
- (iv) post-anterior and left lateral chest X-rays (356 mm x 432 mm) and pulmonary function tests including at least forced vital capacity (FVC) and forced expiratory volume in one second (FEV₁), and

(b) an annual or other periodic medical examination and tests and X-rays consisting of the items prescribed by clause a.

(2) The methods and procedures used to carry out pulmonary function tests shall be acceptable to the Chief Physician of the Occupational Health Medical Services of the Ministry.

13. (1) Where the health of a worker has been impaired by exposure to asbestos the physician who has examined the worker or performed or caused the tests of the worker to be performed shall report forthwith in writing his findings and recommendations to the worker, the employer, the Chief Physician, Occupational Health Medical Service of the Ministry, and with the consent of the worker, to his physician, if any.

(2) Upon the request of a worker or his authorized agent, reports of the results of medical examinations or tests shall be provided forthwith to the worker or his authorized agent.

14. (1) The employer shall provide a copy of the personal exposure record of a worker to the physician who examines the worker or performs or causes the tests of the worker to be performed.

(2) The records of medical examinations, X-rays and tests of a worker by the physician who has examined the worker or performed or caused the tests of the worker to be performed and the personal exposure records of a worker shall be kept in a secure place by the physician and the employer, as the case may be, for,

(a) a period of forty years from the time such records were first made; or

(b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

(3) Where the physician or the employer, as the case may be, is no longer able or willing to keep the records, the records shall be forwarded to the Chief Physician, Occupational Health Medical Service of the Ministry, or a physician designated by the Chief Physician who shall keep them in a secure place.

(4) The records of medical examinations, X-rays and tests and the personal exposure records of a worker shall be made available to the worker or his authorized agent.

15. Subject to section 18, the procedure for determining the airborne concentration of asbestos in the atmosphere of a work place or to which a worker may be exposed shall be the procedure set out in the Code for Measuring Airborne Asbestos Fibres dated the 15th day of August, 1980, and issued by the Ministry.

16. The results of air monitoring in the work place under the asbestos control program shall be,

- (a) posted forthwith by the employer as soon as the results are available in a conspicuous place or places at the work place where they are most likely to come to the attention of the workers for a period of at least fourteen days;
- (b) furnished to the joint health and safety committee; and
- (c) kept for a period of at least five years.

17. The personal exposure records of a worker to be maintained under the asbestos control program shall identify the worker, including his date of birth and the maiden surname of his mother, his jobs or occupations at the work place, the work operations performed by him during his employment, the results of monitoring for his exposure to airborne asbestos, his exposures to asbestos and the dates and length of time the worker used respiratory equipment and its type.
18. For the purposes of this Regulation the methods and procedures that may be used or adopted to determine the airborne concentration of asbestos in the atmosphere of a work place or to which a worker may be exposed may vary from the Code issued by the Ministry if the factors of accuracy and precision used or adopted are equal to or exceed the factors of accuracy and precision in the Code issued by the Ministry.
19. (1) The Ministry may approve laboratories for the purposes of carrying out and performing analyses and tests of airborne concentrations of asbestos.
- (2) Analyses and tests of the airborne concentrations of asbestos in a work place or to which a worker may be exposed shall be carried out and performed by laboratories approved by the Minister.
20. (1) This Regulation, except sections 4, 7, 8, 10 to 12 and 14 to 18 come into force on the day this Regulation is filed.
- (2) Sections 4, 7, 8, 10 to 12 and 14 to 18 come into force ninety days after the day this Regulation is filed.

SCHEDULE

The time-weighted average exposure of a worker to airborne asbestos shall be calculated as follows:

1. The average concentrations of asbestos to which a worker is exposed shall be determined from analyses of air samples taken as being representative of the exposure of the worker to asbestos during work operations.
2. The results of the analyses are the concentrations expressed as the number of fibres per cubic centimetre of air.
3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.
4. The weekly exposure shall be calculated as follows:

$C_1 T_1 + C_2 T_2 + \dots C_n T_n = \text{cumulative weekly exposure,}$
where C_1 is the concentration found in an air sample and T_1 is the total time in hours to which the worker is taken to be exposed to concentration C_1 in a week.

5. The time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.

SCHEDULE

The time-weighted average exposure of a worker to airborne isocyanates shall be calculated as follows:

1. The average concentrations of isocyanates to which a worker a worker is exposed shall be determined from analyses of air samples taken as being representative of the exposure of the worker to isocyanates during work operations.
2. The results of the analyses are the concentrations expressed as parts of organic isocyanates in a million parts of air or micromoles of organic isocyanates per cubic metre of air.
3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.
4. The weekly exposure shall be calculated as follows:

$$C_1T_1 + C_2T_2 + \dots C_nT_n = \text{cumulative weekly exposure,}$$

where C_1 is the concentration found in an air sample and T_1 is the total time in hours to which the worker is taken to be exposed to concentration C_1 in a week.

5. The time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.

THE ENERGY ACT, 1971

O. Reg. 629/80.
Gas Pipeline Systems.
Made—July 31st, 1980.
Filed—August 1st, 1980.

REGULATION MADE UNDER
THE ENERGY ACT, 1971

GAS PIPELINE SYSTEMS

1. In this Regulation,

- (a) “operating company” means an individual, partnership, corporation, public agency or other entity operating a gas pipeline system;
- (b) “professional engineer” means a person who is a member or licensee of the Association of Professional Engineers of the Province of Ontario. O. Reg. 629/80, s. 1.

2.—(1) The Standard issued by the Canadian Standards Association entitled CSA Standard Z184-M1979 Gas Pipeline Systems, as it exists on the day this Regulation comes into force and the standards, specifications, codes and publications set out therein as reference publications insofar as they apply to the said Standard are adopted as part of this Regulation with the following changes:

- 1. Clause 1.1.1. is revoked and the following substituted therefor:

1.1.1. This Standard covers the design, fabrication, installation, inspection, test-

ing, and the safety aspects of operation and maintenance of gas pipeline systems including transmission lines, compressor stations, metering and regulating stations, distribution lines and service lines.

- 2. The explanations and note under Table 3.2 are revoked and the following substituted therefor:

*Category I does not require proven notch toughness properties. Category II materials shall have minimum Charpy V-notch toughness requirements of 20J at the design temperature.

+Category I valves, fittings and flanges may be specified for pipe runs less than 50 metres in length.

NOTE: Valves to AP16D, Specification for Pipeline Valves, that have been qualified for design temperatures below -29 degrees Celsius meet Category II requirements at or above the test temperature used.

- 3. The explanations under Table 3.3 are revoked and the following substituted therefor:

*For pipe runs exceeding 50 metres in length Category II pipe should be specified when the design operating stress exceeds 145 MPa for pipe in Class Location 2, or 120 MPa for pipe in Class Location 3, or 95 MPa for pipe in Class Location 4.

+Category I pipe may be specified for pipe runs less than 50 metres in length.

Table 6.6 is revoked and the following substituted therefor:

Table 6.6*

4	Approved Liquid	1.40xm.o.p.	Clause 6.4.9.3.	t.p.-1.40 or d.p.

*This Table brings out the relationship between test pressures and maximum allowable operating pressure subsequent to the test. If an operating Company decides that the

maximum operating pressure will be less than the design pressure, a corresponding reduction in prescribed test pressure may be made as indicated in Column 3. However, if the reduced test pressure is used, the maximum operating pressure cannot later be raised to the design pressure without retesting the pipeline to the test pressure prescribed in Column 4. (See Clauses 2.1 and 6.8.1)

NOTES:

- (1) m.o.p.=maximum operating pressure (not necessarily the maximum allowable operating pressure).
- (2) d.p.=design pressure.
- (3) t.p.=test pressure.
- (4) For definitions of terms S, D, t, E, and T, see Clause 6.4.1.1.

(2) Where there is a conflict between a provision of a standard, specification, code or publication adopted in subsection 1 and the provisions of this Regulation, the provisions of this Regulation shall prevail. O. Reg. 629/80, s. 2.

- (a) written acknowledgement from the Director that the installation, extension, replacement or reclassification, as the case may be, conforms to the requirements of the Act and this Regulation; or
